*Allowable Subject Matter*

1. Claims 1-6, 8-10, and 12-14 are allowed.

Claims 1, 10 are independent claims.

The following is an examiner's statement of reasons for allowance:

**As to claim 1**, the present invention from the application discloses a method for retrieving a periodically changing document on a document delivery system, comprises “storing the address including the modified temporal field for the document in a print schedule, automatically requesting, without user intervention, said updated document based on the print schedule; transmitting said updated document to a printing device, and automatically printing, without user intervention, the document on said printing device”.

**As to claim 10**, the present invention from the application discloses an apparatus for periodically retrieving a changing document having an address, in which “a printing device operatively coupled to said document server; wherein said document server automatically transmits, without user intervention, the changed documents to said printing device; and wherein said printing device automatically prints, without user intervention, the changed documents on said printing device”.

However, the closest prior art such as Meyerzon et al. (US Patent No. 6,638,314 B1) and Chow et al. (US Patent No. 6,029,175), including an updated electronic text search, fails to anticipate or render the above underlined limitations of claims 1 and 10 obvious.
